Celebrating a quarter century of the car that redefined its genre. [apply edits made above] The Mazda MX-5, (known as Miata in North America and Eunos Roadster in Japan), revolutionized the lightweight two-seater roadster market. By taking the front-engine, rear-wheel-drive layout of traditional British and Italian roadsters and combining it with the modern function and reliability for which Japanese cars were justly famous, Mazda created what many consider the perfect sports car. The MX-5 became the best-selling sports car of all time, selling over a million units worldwide. Customers proved that they hadn't lost their desire for simple, lightweight two-seat convertibles; they had simply lost their desire for unreliable, archaic European anachronisms that caught on fire as part of their charm. In 2009, English automotive critic Jeremy Clarkson wrote: "The fact is that if you want a sports car, the MX-5 is perfect. Nothing on the road will give you better value. Nothing will give you so much fun. The only reason I'm giving it five stars is because I can't give it 14." Mazda MX-5 Miata: Twenty-Five Years is a handsomely-illustrated coffee-table book celebrating Mazda's ground-breaking MX-5 Miata, the car that revolutionized the lightweight two-seater roadster market.

This new book tells the story of BMW's Z3 and Z4 two-seater roadsters and coupes, which since 1995 have been at the forefront of the affordable sports car market. Carroll Shelby, legendary driving ace, race team owner, and designer of Shelby Cobra, Daytona, and Mustang GT350 classics is revered by automotive enthusiasts, yet little has been written about the last quarter century of Carroll Shelby's life. During that time Chris Theodore, VP at Chrysler and Ford, developed a close personal friendship with Carroll. The Last Shelby Cobra chronicles the development of the many vehicles they worked on together (Viper, Ford GT, Shelby Cobra Concept, Shelby GR1, Shelby GT500 and others). It is an insider's story about how Shelby came back to the Ford family, and the intrigue behind the five-year journey to get a Shelby badge on a Ford Production Vehicle. The author provides fresh insight and new stories into Shelby's larger-than-life personality, energy, interests and the many unpublished projects Carroll was involved with, up to his passing. Finally, the book describes their unfinished project, the Super Snake II Cobra, and the serendipitous circumstances that allowed to the author to acquire 'Daisy,' the last Shelby Cobra. To his many fans, Carroll Shelby was truly 'the most interesting man in the world.'

The history of hot rodding and performance cars has been well chronicled through the years. Books and magazines have covered the cars, builders, pioneers, engineers, early racers, muscle cars, street racers, etc. Most take a nostalgic and fun look at the cars that many have loved their entire lives. Some even cover the lifestyle, the hobby as it involves people, and the effort, time, and commitment people put into it. It is more than just a hobby to most, and to many, a certain wave of nostalgia comes over them when remembering what the car scene was like "back in the day." The local speed shop is an important element of the nostalgic feeling that people have when fondly remembering their hot rodding youth. Speed shops were not just parts stores, they were a communal gathering place for car guys wanting to talk smart, bench race, and catch up on the local scene, as well as to solicit the expert advice from the owner or staff behind the counter. Here,

longtime hot rodder and industry veteran Bob McClurg brings you the story of the era and the culture of speed shops as told through individual shop's histories and compelling vintage photography. He covers the birth of the industry, racing versus hot rodding, mail-order, and advertising wars. You learn about the performance boom of the 1960s and 1970s, lost speed shops as well as survivors, and an overview of the giant mail-order speed shops of today.

This is the story of an unstoppable force coming up against the stubbornness of an immovable object – that is, Ford against Ferrari. Enzo Ferrari, whose company produced fewer than four hundred cars per year in 1963, wasn't going to bow to Ford after he had turned down its offer to buy his company.
