For those who are familiar with the first edition, it will be convenient to have some indication of where the main changes lie. Chapter one has been largely rewritten to give an outline of current approaches to a model of comprehension of spoken language. Chapter two has a new initial section but otherwise remains as it was. Chapter three incorporates a new section on "pause" and how this interacts with rhythm, and rather more on the function of stress. Chapter four has an extended initial section but otherwise remains largely as it was. Chapter five on intonation contains several sections which have been rewritten to varying extents. Chapter six of the first edition has disappeared: in 1977, very little work had been published on "fillers" and it seemed worthwhile incorporating a chapter that sat rather oddly with the phonetic/phonological interests of the rest of the book. Not that there is a great industry of descriptions of the forms and functions of these and similar phenomena there seems no reason to retain this early but admittedly primitive account. The chapter on "paralinguistic vocal features", now chapter six, has some rewriting in the early part but considerable rewriting in the last sections. The final chapter on "teaching listening comprehension" has grown greatly in length. It still incorporates some material from the original chapter but most of it is completely rewritten.

Increasing numbers of people have connections with one country, but live and work in another, frequently owning property or investments in several countries. People with lifelong or subsequently developed impairments of capacity move cross-border or have property or family interests or connections spread across different jurisdictions. This new work fills a gap in a specialist market for a detailed work advising lawyers on all the considerations in these situations. The book provides a clear, comprehensive, and unique overview of all relevant capacity and private international law issues, and the existing solutions in common law and civil law jurisdictions and under Hague Convention XXXV. It sets out the existing law of various important jurisdictions, including detailed chapters on the constituent parts of the UK, Ireland, Jersey, the Isle of Man and the Hague 35 states; and shorter chapters on 26 Non-Hague states and those within federal states, including coverage of the United States, several Australian and Canadian states, and a number of other Commonwealth jurisdictions. Containing a number of helpful case studies and flowcharts, the book draws upon the expertise of the editors in their respective fields, together with detailed contributions from expert practitioners and academics from each relevant jurisdiction. All the editors and many of the contributors and correspondents are members of STEP.

Carrie's tale of uncompromising sexual adventure is like the Story of O starring a Berkeley Ph.D. in comparative lit (who moonlights as a bike messenger) with a penchant for irony, self-analysis and anal sex. Set in San Francisco and the Napa valley, Carrie's Story takes the reader on a journey into a netherworld of slave auctions, training regimes, and human 'ponies' preening for dressage competitions. 'My favourite neo-Victorian erotic romance writer... Bring on the ponies!' - Susie Bright

"Beauvoir in Time situates Simone de Beauvoir's The Second Sex in the historical context of its writing and in later contexts of its international reception, from then till now. The book takes up three aspects of Beauvoir's work more recent feminists find embarrassing: "bad sex," "dated" views about lesbians, and intersections with race and class. Through close reading of her writing in many genres, alongside contemporaneous discourses (good and bad novels in French and English, outmoded psychoanalytic and sexological authorities, ethnographic surrealism, the writing of Richard Wright and Franz Fanon), and in light of her travels to the U.S. and China, the author uncovers insights more recent feminist methodologies obscure, showing Beauvoir is still good to think with today"--

This volume presents an overview of major cultural themes in contemporary France. The section on politics deals with the issue of political cohabitation, the evolution of the Communist Party, the environment, social systems and the European Union. In the social arena, the articles encompass the evolution of the family, benefits for the elderly, the education system, and the social implications of graffiti. The changing nature of French identity is brought to light through an analysis of the press and the debate on multiculturalism. A review of cultural issues includes the notion of leisure, the contemporary social novel, the cosmopolitan tradition in French film, and new cultural spaces. The work concludes with perceptions of France from the United States as seen through diplomatic relations and remakes of French films, and a final essay on France. The various articles include numerous bibliographic references and will be of great interest to Francophiles, academics, and students of French language and culture.

How language users from different linguistic backgrounds cope with forms of complexity is still a territory with many unanswered questions. The current book is concerned with morphologically and syntactically complex items, that is, derivatives, inflected forms, compounds, phrases and forms related by agreement and examines how these constructions are acquired and learned in a great range of different languages, such as Turkish, Welsh, Basque and Catalan. Relying on a variety of methodologies targeting production or comprehension, among others, lexical decision and priming experiments, an EEG study, a corpus analysis and a reading test, the authors consider data from native speakers mastering one or more languages and second-language users. Overall, the volume reflects upon and contributes to our understanding of how the peculiarities of language and its users affect the learnability of complex forms.
