Jan Richardson, best-selling author of *The Next Step in Guided Reading* and *Next Step Guided Reading Assessment* shows teachers how to plan and teach successful, well-paced lessons from start to finish.

This action research report describes a program to increase students' reading comprehension and fluency through the use of guided reading. The targeted population consists of second and fourth grade students in a northwest suburban area of a large city located in the Midwest. The problems of low reading comprehension and fluency scores were documented through the use of district provided comprehension and fluency assessments and teacher surveys. The literature showed multiple factors that contribute to the problem of low reading fluency and comprehension scores. These factors included individual students, school curriculum and classroom environment, teacher training, and family involvement. Literature review suggested the following solutions to improve reading comprehension and fluency: increasing family involvement, teaching thinking skills, creating flexible groups in the classroom, utilizing a meaningful reading curriculum, improving teacher education, and setting up a positive classroom environment. These researchers focused on the use of leveled texts, graphic organizers, and flexible groups during guided reading. The analysis of student achievement

data was determined by looking closely at district fluency and comprehension assessment scores as well as teacher surveys. The teacher researchers created lessons in which the students were working in reading centers and in small teacher-lead flexible guided reading groups. The students also completed activities that improved their reading comprehension and fluency. After completing the sixteen-week study the students were assessed using district provided comprehension and fluency assessments. In addition to these assessments, a rubric was used to evaluate each of the graphic organizers completed by the students. Post intervention analysis of the district provided comprehension assessment, district provided fluency assessment, and rubric for the independent use of graphic organizers showed that both the second and fourth grade students at Sites A and B increased in the areas of reading comprehension and fluency. All in all the interventions of guided reading with leveled texts, flexible grouping, and graphic organizers yielded positive results for the second and fourth grade students at both Sites A and B. Appended are: (1) Teacher Survey; (2) Graphic Organizer Rubric; and (3) Lesson Plans; and (4) Revised Lesson Plans. (Contains 5 tables and 11 figures.) [Master Thesis, Saint Xavier University].

THE BESTSELLING CLASSIC ON 'FLOW' – THE KEY TO UNLOCKING MEANING, CREATIVITY, PEAK PERFORMANCE, AND TRUE HAPPINESS Legendary psychologist Mihaly Csikszentmihalyi's famous investigations of "optimal experience" have revealed that

what makes an experience genuinely satisfying is a state of consciousness called flow. During flow, people typically experience deep enjoyment, creativity, and a total involvement with life. In this new edition of his groundbreaking classic work, Csikszentmihalyi ("the leading researcher into 'flow states'" —Newsweek) demonstrates the ways this positive state can be controlled, not just left to chance. Flow: The Psychology of Optimal Experience teaches how, by ordering the information that enters our consciousness, we can discover true happiness, unlock our potential, and greatly improve the quality of our lives. "Explores a happy state of mind called flow, the feeling of complete engagement in a creative or playful activity." —Time

As a teacher of literacy, you transform the lives of the children in your classroom. The *Reading Minilessons Book* offers short, concise, purposeful lessons with a practical application in a specific area of literacy. Each minilesson engages children in inquiry that leads to the discovery and understanding of a general principle. Growing out of the interactive read-aloud experience and linked to independent reading, teachers use many of these texts as examples from which they generalise the understanding. Each of the four types of reading minilessons (management, literary analysis, strategies and skills, and writing about reading) in *The Reading Minilessons Book* is organised into broad categories, or "umbrellas." An umbrella helps children develop a deeper understanding of concepts and their application. As lessons build on each other, teachers will often make an anchor chart, or visual representation, that can be referenced again and again as children encounter new texts and/or minilessons. The Fountas & Pinnell Classroom(tm) *Reading Minilessons Book, Grade 4* contains 225 reading

minilessons.

Reading fluency has been identified as a key component of proficient reading.

Research has consistently demonstrated significant and substantial correlations between reading fluency and overall reading achievement. Despite the great potential for fluency to have a significant outcome on students' reading achievement, it continues to be not well understood by teachers, school administrators and policy makers. The chapters in this volume examine reading fluency from a variety of perspectives. The initial chapter sketches the history of fluency as a literacy instruction component. Following chapters examine recent studies and approaches to reading fluency, followed by chapters that explore actual fluency instruction models and the impact of fluency instruction.

Assessment of reading fluency is critical for monitoring progress and identifying students in need of intervention. Two articles on assessment, one focused on word recognition and the other on prosody, expand our understanding of fluency measurement. Finally, a study from Turkey explores the relationship of various reading competencies, including fluency, in an integrated model of reading. Our hope for this volume is that it may spark a renewed interest in research into reading fluency and fluency instruction and move toward making fluency instruction an even more integral part of all literacy instruction.
