Not only does almost everyone in the civilized world use a personal computer, smartphone, and/or tablet on a daily basis to communicate with others and access information, but virtually every other modern appliance, vehicle, or other device has one or more computers embedded inside it. One cannot purchase a current-model automobile, for example, without several computers on board to do everything from monitoring exhaust emissions, to operating the anti-lock brakes, to telling the transmission when to shift, and so on. Appliances such as clothes washers and dryers, microwave ovens, refrigerators, etc. are almost all digitally controlled. Gaming consoles like Xbox, PlayStation, and Wii are powerful computer systems with enhanced capabilities for user interaction. Computers are everywhere, even when we don't see them as such, and it is more important than ever for students who will soon enter the workforce to understand how they work. This book is completely updated and revised for a one-semester upper level undergraduate course in Computer Architecture, and suitable for use in an undergraduate CS, EE, or CE curriculum at the junior or senior level. Students should have had a course(s) covering introductory topics in digital logic and computer organization. While this is not a text for a programming course, the reader should be familiar with computer programming concepts in at least one language such as C, C++, or Java. Previous courses in operating systems, assembly language, and/or systems programming would be helpful, but are not essential.

It's the first day of summer in the swamps of South Louisiana. Twelve-year-old Cajun boys Billy Boudreaux and Nick Landry are preparing their "Swamp Camp" for an upcoming camp out

when they encounter the elderly Mr. Pierre as he makes a mad dash to escape the legendary swamp monster, Rougarou. Breathless and terrified, he vows to abandon his home in the swamps of Pierre Part, Louisiana, and to never return. Doubtful that the creature is anything more than a myth and wanting to help their neighbor, Billy and Nick set out to solve The Mystery of the Rougarou. In the course of their adventure, they stumble upon the hideout of an escaped convict, Lufroy Aucoin, and his dimwitted cousin, Gator Bait. To make matters worse members of the hillbilly mafia, run by the ruthless Roscoe Clinton, will be arriving soon to purchase the stolen property Lufroy has stock piled at this remote location. After being captured, our young heroes must use all the skills and knowledge they have of this dangerous environment to not only make their escape, but to survive what will be the most difficult challenges they have ever faced. The boys will introduce you to the unique beauties of the swamp, unfortunately, with beauty, comes danger.

Hiring a manager may be the most important decision a local governing board makes. To make sure the new manager will be a good fit for the organization, the board needs to agree on expectations for the new manager and design a process that will enable it to hire the best candidate for the job. This guide, part of the Local Government Board Builders series, provides local elected officials with an overview of their responsibilities in hiring a public manager and outlines the essential steps in a successful hiring process. A free PDF of the table of contents is available (<https://www.sog.unc.edu/publications/books/getting-right-fit-governing-board%E2%80%99s-role-hiring-manager/details>). - Lower your risk of metabolic disorders, disease, and chronic weight gain
- Protect yourself against the estrogenic substances in the environment, products, water, and food
- Learn how certain foods and herbs can protect you!

Estrogenic chemicals—known for causing the near extinction of various living species—are found in some of the most common foods we eat. In this revolutionary diet book, Ori Hofmekler addresses the millions of overweight and obese individuals who have failed or are disappointed with other diets—those who suffer from yoyo dieting, weight gain rebounds, or accumulation of stubborn fat in the belly and other estrogen-sensitive areas. Focusing on our current over-exposure to estrogenic chemicals in the environment, foods, and water, *The Anti-Estrogenic Diet* provides a practical solution to fat gain, estrogen-related disorders (PMS, endometriosis, fibrocystic disease), and increased risk of common cancers in women and men (breast, ovarian, cervical, prostate). Allowing you to still enjoy your favorite foods, the program is based on incorporating anti-estrogenic foods, spices, and herbs into your diet, while eliminating estrogenic foods and chemicals. Exposing dietary myths and fallacies, Hofmekler teaches readers that
