Friends all year. In winter, spring, summer, and fall, Frog and Toad are always together. Here is a wise and wonderful story for each season of the year-and one for Christmas, too.

With over 7,000 known species, frogs display a stunning array of forms and behaviors. A single gram of the toxin produced by the skin of the Golden Poison Frog can kill 100,000 people. Male Darwin's Frogs carry their tadpoles in their vocal sacs for sixty days before coughing them out into the world. The Wood Frogs of North America freeze every winter, reanimating in the spring from the glucose and urea that prevent cell collapse. The Book of Frogs commemorates the diversity and magnificence of all of these creatures, and many more. Six hundred of nature's most fascinating frog species are displayed, with each entry including a distribution map, sketches of the frogs, species identification, natural history, and conservation status. Life-size color photos show the frogs at their actual size—including the colossal seven-pound Goliath Frog. Accessibly written by expert Tim Halliday and containing the most up-to-date information, The Book of Frogs will captivate both veteran researchers and amateur herpetologists. As frogs increasingly make headlines for their troubling worldwide decline, the importance of these fascinating creatures to their ecosystems remains underappreciated. The Book of Frogs brings readers face to face with six hundred astonishingly unique and irreplaceable species that display a diverse array of adaptations to habitats that are under threat of destruction throughout the world.

"Introduces the reader to frogs and toads."--

"Webbed feet. Slimy or dry. Lives on land or in water. Is it a frog or a toad? Look inside to learn how these cold-blooded animals are alike and how they differ."--

Caldecott Honor-winning team Steve Jenkins and Robin Page explore form, color, and pattern, and capture the very unique nature of frogs in this brilliantly illustrated picture book. Perfect for fans of The Beetle Book, and young readers looking for nonfiction about this perennially fascinating animal. Long legs, sticky tongues, big round eyes, and other dazzling features--what's not to love about frogs? In this magnificently illustrated picture book, Caldecott Honor-winning team Steve Jenkins and Robin Page explore one of the world's most diverse--and most threatened--animals. With more than 5,000 different frog species on the planet, in every color of the rainbow and a vast number of vivid patterns, no creatures are more fascinating to learn about or look at. Jenkins and Page present a stunning array of these intriguing amphibians and the many amazing adaptations they have made to survive.

Frog and Toad are always there for each other -- just as best friends should be. From sledding in winter to eating ice cream on hot summer days, these two friends have fun together the whole year round!

This satisfying story explores the powerful impact of our actions on the world around us. When his father takes a new job in Massachusetts, Ben Moroney must leave behind his best friend Tony, a western banded gecko named Lenny, and worst of all, the Arizona desert home he has loved and explored. Ben's adjustment to his new environment is not going well until he unexpectedly finds a kindred spirit in his eccentric fifth-grade science teacher, Mrs Tibbets. She introduces him to the rare and elusive Eastern spadefoot toads that make their home on her rural property. When Ben discovers that Mrs. Tibbets's land may be sold to developers, he knows he has to do something. As Ben's obsession with saving the spadefoot toads' habitat grows, his schoolwork and his relationships with his family and new friends suffer. But just when it seems things can't get any worse, Ben finds a way to meet his responsibilities to the people around him and demonstrates the importance of even the smallest efforts to save the earth's rapidly disappearing habitats. With great environmental themes, this appealing middle grade novel comes from renowned storyteller and two-time Grammy Award winner Bill Harley.

Two amphibians vie for superiority--before banding together against a toothy foe--in a humorous, light-hearted fable about seeing past differences. Frog is a frog and Toad is a toad. They are clearly totally different from each other. So when an unlucky fly mistakes Frog and Toad for two frogs, the two are determined to set the record straight. After all, Toad is obviously stronger, while Frog is unmistakably the superior hopper . . . and before long, things start to get a bit heated among the amphibian population in the swamp. But when the two rivals have a close encounter with a snappy alligator, both Frog and Toad see the benefit of joining forces. Perhaps they're not so different after all? In his authorial debut, author-illustrator Ben Mantle offers a laugh-out-loud look at putting aside differences and celebrating the fact that friends come in all shapes and sizes.

Bestselling children's author Kay de Silva presents "Dolphins." The book uses captivating illustrations, and carefully chosen words to teach children about 'the acrobat of the sea'.
